

PORT OF EPHRATA

PORT DISTRICT NO. 9 OF GRANT COUNTY, WASHINGTON

The Port of Ephrata is soliciting quotes for the purchase of airfield pavement crack sealing material. This material must meet ASTM Specification D6690 Type III, Federal Specification SS-S-1401C and FAA Specification P605. It must be bulk palletized for delivery with each unit in solid form, packaged in either cardboard boxes or meltable, boxless packaging, weighing no more than 35lbs each. The material must be compatible for application via Crafcro Supershot 125 pressure feed melter/applicator owned by purchaser. Quote price per pound of material delivered to Ephrata, WA including sales tax (8%), based upon a full truckload (include number of pallets and approximate total weight of material per full truckload). Email quote and product information to mwren@portofephrata.com by close of business on April 13, 2017. Call 509-754-3508 with questions.
